CW NEXT CHAT

DICTATION**Control-Shift-D**

Inserts dictated text into the focused composer.

TOGGLE VOICE**Control-Shift-V**

Toggles voice chat while ChatGPT is focused.

GLOBAL VOICE**Cmd-Opt-F13**

User-bound hotkey that opens voice chat from anywhere in macOS.

ONE-TIME CUSTOM BINDINGS

Record these physical signals in ChatGPT Settings.

SIGNAL	CHATGPT COMMAND
Command-Option-F13	Global voice chat hotkey
Control-Option-Command-[	Decrease reasoning effort
Control-Option-Command-]	Increase reasoning effort
Control-Option-Command-M	Open model picker
F14	Toggle plan mode
F15	Toggle Fast mode
F16	Attach files and folders
F17	Approve request
F18	Decline request
F19	Copy as Markdown
F20	Continue in new chat
F21	Open side chat
F22	Open project picker

Ctrl-Opt-Cmd-M opens Model Picker; Cmd-Opt-F13 remains Global Voice.

Approve / Decline act on permission requests, not individual review diffs.

WORK PROMPTS / EXACT INSERTED TEXT**1. SUMMARIZE**

Summarize progress, blockers, and next steps.

2. IMPLEMENT

Implement the change. Preserve unrelated work and verify it.

3. REVIEW ONLY

Review changes for bugs, risks, and missing tests. Do not edit.

4. EXPLAIN

Explain the code or problem and its key tradeoffs.

5. DIAGNOSE ONLY

Diagnose the root cause. Do not edit; report evidence and a fix.

6. VERIFY

Run relevant tests. Investigate and summarize failures.

7. UPDATE DOCS

Update documentation for the current change.

8. PLAN FIRST

Propose a concise plan before editing.

Prompts insert text only. Review, diagnosis, and explanation prompts preserve their no-edit boundaries.

USE NOTES

- Hold WORK from CHAT, CONTROL, or REVIEW; release to return to the previous mode.
- Pure VIA cannot trigger per-diff Accept or Reject unless ChatGPT exposes bindable commands.
- If a custom command is unavailable in your app build, leave that signal unbound.
